Standard Fiber Pet

DuPont Innovations for the Home™

AirCell™ Memory Foam

AirCell's open-cell foam technology allows air and moisture to easily flow through the entire structure.

EnFresh™ Fabric

EnFresh odor neutralizing technology is an innovative way to sustain freshness in home textiles.

DuraPel™ Protection

DuraPel provides breakthrough spill resistance resulting in fabrics holding up under the toughest spills and stains.

NovaCool™ Fabric

NovaCool is a thermal conductive technology that pulls heat from the body and creates an immediate cooling sensation.

NuAir™ Fabric

NuAir is a tightly woven fabric that inhibits dust mites, pet dander and associated allergens.

Purasense™ Fiberfill

Purasense 7D and 15D hollow conjugated siliconized virgin fiberfill is engineered to provide loft, softness, and support for all your bedding products.

Purion™ Fabric

Purion is a non-migrating antimicrobial technology designed to eliminate bacteria that causes fabric odors.

Aircell™

Memory Foam

AirCell™ is a breakthrough open-cell foam technology. Air and moisture can easily flow through the entire structure. Traditional memory foam has closed pockets which do not allow air and moisture to flow through.

- Open-cell construction
- Increased air circulation
- Keeps cool during the night
- Helps to facilitate restorative sleep and temperature control
