Standard Fiber Pet

DuPont Innovations for the Home™

AirCell™ Memory Foam

AirCell's open-cell foam technology allows air and moisture to easily flow through the entire structure.

EnFresh™ Fabric

EnFresh odor neutralizing technology is an innovative way to sustain freshness in home textiles.

DuraPel™ Protection

DuraPel provides breakthrough spill resistance resulting in fabrics holding up under the toughest spills and stains.

NovaCool™ Fabric

NovaCool is a thermal conductive technology that pulls heat from the body and creates an immediate cooling sensation.

NuAir™ Fabric

NuAir is a tightly woven fabric that inhibits dust mites, pet dander and associated allergens.

Purasense™ Fiberfill

Purasense 7D and 15D hollow conjugated siliconized virgin fiberfill is engineered to provide loft, softness, and support for all your bedding products.

Purion™ Fabric

Purion is a non-migrating antimicrobial technology designed to eliminate bacteria that causes fabric odors.

NuAirTM

NuAir™

Tightly Woven, Allergen Barrier Fabric

NuAir™ is a tightly woven fabric that inhibits dust mites, pet dander and associated allergens. With an average pore size of less than 10 microns, NuAir remains breathable while preventing new allergens from entering and prohibiting accumulated allergens from being released into the sleeping environment.

- Tightly woven fabric
- Allergen barrier
- Breathable
