INNOVATIVE TEXTILE SOLUTIONS

Standard Fiber Pet

Elements of Sleep™

Our bedding technologies have been divided into five Elements of Sleep categories – Wellness, Comfort, Protection, Design and Sustainability. We do more than manufacture innovative bedding products. We invent them.

Wellness

Our smart fabrics incorporate organic cottons, vegetable dyes, allergen barriers, odor reducing and anti-static technologies. If you sleep better, you feel better.

Protection

Protect your investment with our unique barrier constructions and functional fabrics

Design

Our new innovative designs will bring color, texture and function to your bedding products.

Comfort

Providing the best night's sleep through temperature and moisture management, airflow and support.

Sustainability

Our sustainable collection of natural fibers and yarns from post-consumer recycled materials are better for the environment and meet upcoming retailer requirements.

Protection

Protection

STAIN REPELLENT – Breakthrough spill resistance resulting in fabrics holding up under the toughest spills and stains including muddy paws and accidents

WATERPROOF – High-performance repellency provides a soft and quiet waterproof barrier, great for outdoor and travel bedding products

ANTIMICROBIAL – A non-migrating antimicrobial technology designed to eliminate bacteria that causes fabric odors by attracting and neutralizing them

DURAPEL™ Protection provides breakthrough spill resistance resulting in fabrics holding up under the toughest spills and stains
